RAYMOND
A live town in a rich agricultural and stock-raising district. A good place to make your home.

Funeral Services Of Clifford Scoville

Funeral services over the remains of Clifford Scoville, who passed away last Thursday, were held in the Second Ward Chapel Saturday afternoon at 1 p.m., with Bishop Walker in charge. C. E. Strong was in charge of the choir, with Mrs. Paul Dahl at the organ.

Hymns by the choir were "Oh My Father," "Shall We Meet Beyond the River," and "Sometime We'll Understand." Special numbers were a Male Quartette "In Time of Roses," by F. R. Taylor and Co., Vocal Solo "Resignation" by Louie Brandley, Baritone Solo "Going Home," Jos. McLean.

Speakers at the funeral were Pres. J. W. Evans, James S. Anderson and Bishop Walker, who all paid high tribute to the clean life of deceased, and the splendid example he had set for the boys of the town and district. Considering the trouble and suffering through which deceased had passed, all felt his passing was a blessing, and while he would be greatly missed by his family and friends, still he had lived well, and completed his mission in life. Elder Anderson read several passages of scripture from the Doctrine and Covenants and Book of Mormon.

The opening prayer was offered by Pres. Snow, benediction by Wilford Honinger, and the grave was dedicated by S. I. May.

Floral offerings were beautiful and profuse, and with the family connections of the Scoville, Hicken and McMullin families, the mourners were there in large numbers. A great number of cars followed the remains to the cemetery, where interment was made, with Christen Bros. in charge.

Pall bearers were young friends of the deceased and were: Wm. Zemp, Samuel and Walter Fairbanks, Earl Zemp, Mac and Lloyd Hicken.

News Notes

J. F. Judd has traded in his Chevrolet on a later model, and while awaiting delivery, is running around in a Nash.

Poley Hawkins is back on the job after being laid up for ten days as a result of running a nail in his foot.

Our next holidays will be on Christmas and New Years. Some say we have too many, but people in stores and offices all the time certainly appreciate them.

Dr. Leech is home from the hospital, and feeling pretty good, although still very weak. He will have to be very careful not to overdo his strength for several months yet.

Weather could not have been more pleasant than we have enjoyed for the past three weeks or more. Clear and warm, just like spring. Flowers and trees look like they will leaf in a few days if this weather keeps on.

An Elders Excursion is planned for Wednesday at the Temple. Make your plans now to attend, and report to your Quorum president. A good company is the desire of those responsible.

Good progress is being made on the new home of Dr. Hall, just south of P. W. Cope's home. Roberts and Strong have the work in charge, and last weekend the rafters and gables were up, and the masonry nearly finished. This home will be completely succeeded when it is finished, and will make a very nice home for the family.

Armistice Day Well Observed

Armistice Day in Raymond was fittingly observed, commencing Sunday morning with the placing of wreaths on the Memorial from where the Veterans marched to the Stake House where Quarterly Conference was in session, held a Memorial service of about 25 minutes, here featured by an Orator by J. H. Blackmore, B.A.

Monday evening the regular Armistice Supper was held in the Club Cafe, and 32 members of the local organization sat down to the banquet tables and enjoyed the good things of the land, amidst reminiscences of former days. Election of officers resulted as follows:

President—C. D. Compton.
Vice Pres. F. R. Taylor.
Sec. —Treas. —D. H. McKee.
Chaplain—O. H. Snow.
Executive—B. J. Coombs, W. Witbeck, G. W. Leech, Sam. Dyson, L. B. Middleton.
Rev. Father McGinnis was the speaker at the Banquet and gave a splendid talk on the history of War and Conquest.

Following the supper the crowd adjourned to the Opera House where an Armistice Ball was held, attended by a nice crowd, and everyone enjoying themselves.

News Notes

Gordon Brewerton and Cliff Kearl of Cardston, were Raymond visitors Wednesday.

Mrs. Mary Wolsey, spent a few days here this week visiting her son Thomas and family.

Monday was a regular summer day and everyone thoroughly enjoyed the holiday. Many took motor drives that day.

"The Patsy," at the Second Ward Chapel is one of the shows you will enjoy and remember. Be there at 8 p.m. sharp.

Mesdames Jas. Hamling and Kimball Anderson of Tyrell's Lake were Raymond visitors Monday.

"Lou" King, tell the girls if they want to know how to get their man, be sure and see "The Patsy" tonight. Girls, this should be enough.

Several commercial men were in Raymond Monday, and quite surprised to find the business houses locked up as they were in honor of Armistice day.

W. D. Mendenhall and wife returned recently from the Chicago World's Fair, in a shiny new Studebaker Coach purchased in Windsor.

The elevated grader is doing some fine work on the roads south of town, according to those who have been over these roads. We hope it will do a lasting job.

Mrs. Annie Adams had as her guests Sunday, Thomas Adams and daughter Norma and Mr. and Mrs. Jas. Hamling, all of Tyrell's Lake, who were here for Conference.

Ralph Brothers have built a closed box for their transport and were putting the finishing touches to it Monday. It's a very sturdy box, and will make "Mutt's" winter transport worries a great deal less than they have been. Thos. Roberts did the carpenter work, and J. Hervey the iron work on the box.

Quarterly Conference Convenes

BENNION URGES PEOPLE TO STAY IN CANADA AND BE CONTENTED—MANY OPPORTUNITIES

Quarterly Conference of the Taylor Stake of Zion convened in the Stake House Saturday evening and Sunday last, with Elder S. O. Bennion, representing the General Authorities, and officiating in his capacity as a President of the First Seven Presidents of Seventies.

This was a priesthood Convention Conference, and the following spoke on various phases of Priesthood work and its relation to the progress and advancement of the Church.

President Allen reported the condition of the Stake, which report showed a good thriving condition in all activities, although the attendance and participation of the members of the Priesthood Quorums was still a problem.

President Evans spoke on "Promoting and fostering Quorum activities and interest among members."

E. P. Tanner, "What the Seventies are doing to promote the work of the Church."

Pres. Snow's topic was "Place of Priesthood quorums in government of the Church." He spoke of the growth and expansion of Priesthood Quorums since the organization of the Church, and how they had been organized as the need arose.

The lesser Priesthood quorums were represented by Carl Alfred who spoke on "Opportunities for Services in the Deacons Quorums," Bruce Heggie "What I have done in the Priests Quorum," and Mac Hicken on "What I can do in the Teachers Quorum."

Wm. Redd spoke on "How the Aaronic Priesthood Quorums may be benefited by the Sunday School and Mutual work."

D. L. Galbraith "Opportunities of Elders Quorums for Contributing to the success of Sacrament Meeting and other of the Church activities."

Bishop E. S. Heninger "The Ideal Priesthood Quorum in assisting in Church work." The speaker cited several examples of local activities.

Mrs. J. H. Walker spoke of the work of the Women in the Church and told a very interesting story for the children.

During the Sunday morning session the G.W.V.A. held a short Memorial Service in honor of Remembrance Day.

Congregational singing featured the Saturday evening and Sunday morning sessions with Male Chorus singing two numbers Saturday night and one selection Sunday morning.

SUNDAY AFTERNOON

This was the business session of the Conference, after the opening exercise, the General and Stake authorities were read and sustained by vote of the audience. The presidencies of the 145th and 150th Quorums of Seventies were reorganized with Jas. S. Anderson and J. U. Allred of the 145th and Elder Christian Jensen of the 150th all being released and others called to fill the vacancies. J. B. Roberts and E. P. Tanner are now the senior Presidents of these two respective quorums.

President A. E. Palmer of the Lethbridge Stake and President Edward J. Wood of the Alberta Stake were both present and spoke briefly, the latter on Temple work.

President Bennion took the main part of the time Sunday

afternoon, and delivered a forceful and spiritual talk on "Pre existence, Mortality and Life after Death." Spoke of the effect our spirit existence had upon our earthly life, and the determining influence life here had on immortality. Straight is the gate, and narrow the way, said the speaker, and we should commence in our youth to choose the right way.

President Bennion spoke at all meetings, and Saturday evening and Sunday morning both, urged the people to hold onto their lands, be contented, and unless ill health or some other unavoidable cause demanded it, to quit planning on moving to other locations. He had travelled considerably, and it was his firm belief and opinion, that a better place for the Saints could not be found than right here in Southern Alberta, in the very shades of the Temple. In his Sunday morning talk, he spoke of the progressive effect the great British Empire had exerted on the world and referred to her as the civilizer of nations. In the entrance of Allenby into Jerusalem, the prophecy of Isaiah regarding the rebuilding of Jerusalem and reclamation of Palestine had had its inception, and to day it was being carried rapidly forward.

The Stake Choir was on hand Sunday afternoon, and rendered several beautiful anthems, which with the orchestra accompaniment sounded very good. Stake Chorister Tollestrup had spent a great deal of time in preparation.

The Stake mutual had charge of the Sunday evening services, and Mutual Chorus under the leadership of Wm. C. Stone contributed several numbers, which with the discourse of Pres. Bennion, was a fitting climax to an educational and inspirational conference.

Governor Stoltze On Official Visit

The regular monthly luncheon and meeting of the Raymond Rotary Outpost Club was held Thursday evening, the luncheon being served at 6 p.m. in the United Church.

District Governor Stoltze gave a fine talk to the Club on "The Power of Rotary," and then the meeting adjourned to the Canadian Utilities Office where an effort was made to bring in the International program but as conditions were not right, this was impossible, and Governor Stoltze talked again relating some of his experiences in visiting the various clubs over his district.

The evening was greatly enjoyed by the good representation present.

RAYMOND BADMINTON CLUB

At a meeting of the Raymond Badminton Club held in the Town Hall on Sunday, November 11th, an executive was elected as follows:

President: A. Patterson.
Vice President: R. S. Gibb.
Secretary: B. Beyerstein.
Matters of fees, hours of play, etc., were left in the hands of the executive.

Badminton will be played in the Opera House, three courts will be provided, so that there will be room for all. It is hoped that all interested in the game will give their support, to make the new sport a success in the town.

Girls And The Smoking Habit

Many college and high school girls smoke. "And why not?" they say. Permit me to suggest a few reasons.

Tobacco smoking is a form of narcotic drug addiction which decreases mental and physical efficiency. A physician who has carefully examined the class records of Harvard University for the past fifty years says that not one tobacco user has stood at the head of his class, despite the fact that five-sixths of the male students are smokers.

Dr. Herbert F. Fisk, Principal of Northwestern Preparatory School, Chicago, says: "It is rarely the case that a student who makes any use of tobacco attains to superior scholarship. Of all forms of tobacco using, cigarettes are without question the most harmful."

Repeated experiments on typists have shown that accuracy and speed both depreciate after smoking a cigarette.

The unbiased opinion of leading athletes, those who do not provide paid testimonials for certain brands of cigarettes, is invariably to the effect that athletes and tobacco won't mix. Grantland Rice, once a famous athlete and latterly a prominent sports writer, says: "I have noticed that those who do not smoke, who keep in clean if not exactly strict training, have far more energy, much greater stamina, much better control of their nerves and they also appear to develop much keener knack at picking up a game." Charles Paddock, the sprinter, who for many years held the world record for short distance running, says: "No one can become a start athlete and use tobacco in any form, because it cuts the wind and affects the heart."

Miss Winters, Principal of one of the largest schools for delinquent girls in America, says concerning her institution: "Out of over eleven hundred inmates, only twenty were non-smokers of cigarettes."

All cigarette smokers are not criminals, but nearly all criminals are cigarette smokers.

The potential mothers of the young Canada of the next generation cannot afford to contract a habit that will saddle posterity with its baneful effects.

It is a well established fact that the infant of a smoking mother is always handicapped. Experimentation has shown that the amniotic fluid which surrounds the embryonic babe in the uterus of a tobacco using woman contains nicotine, and that the milk from her breasts likewise contains nicotine.

Dr. Charles L. Barber of Lansing, Mich., in a paper read before the American Association for Medical-Physical Research, said: "A baby born of a cigarette-smoking mother is sick, it is poisoned, and may die within two weeks of birth. The post mortem shows degeneration of the liver, heart and other organs. Sixty per cent of all babies born of mothers who are habitual smokers die before they are two years old."

It is bad enough to have the sins of the fathers visited upon the children, but when mothers augment this baneful heredity what hope is there for the future of the race? The prevalent use of tobacco by both sexes today will undoubtedly predispose to the production of an inferior race of men and women in the future.

From the standpoint of appearance, no young woman can afford to practice a habit which is destructive to her personal charm and beauty.

odor of the breath and perspiration, and the constant saturation of the clothing are not in keeping with the feminine ideal.

Joseph Byrne, Managing Director of the National Beauty Shop Owners' Association (U.S.A.) has said: "The features of women who smoke grow sharper as the nicotine habit fastens on them; the skin becomes taut and shallow, the lips lose their rosy color, the corners of the mouth show wrinkles, the lower lip shows a tendency to project beyond the upper lip, the eyes acquire a stare and the lids rise and fall more slowly."

It is thus apparent that the young women who wish to retain their "schoolgirl complexion" cannot afford to flirt with tobacco.

The habit entails an endless bill of expense for once the addiction is established it cannot be discarded as readily as the varying style of feminine attire.

Canada's annual tobacco bill has more than doubled during the last decade, and now approximates the last sum of \$100,000,000—more than the entire cost of education in all its branches—and this does not take into account the indirect outlay due to impaired health for medical attention, hospital services, and funerals in addition to the loss of life and property by fires caused by smokers' carelessness.

It has been estimated that fully 20 per cent of all fires are caused by the thoughtless dropping of lighted cigarettes. Ontario's Fire Marshall, Mr. E. P. Heaton, considers that this figure is much too low, and regards the cigarette as a most infamous and prolific cause of fires. He further states that a very large percentage of small fires are caused in this way the loss records of which cannot be estimated.

It is evident that on all scores "Lady Nicotine stands indicted. The column of loss is the only one on the tobacco ledger lost money lost efficiency lost health, lost lives.

W. J. McCormick, M. D.
In the Toronto Globe

The school children reluctantly filed back to school Tuesday morning after nearly a week's holiday, during all of which time the weather was simply lovely. Volunteer garden seeds are starting to grow in gardens about town.

Ammon Mercer, Magrath Pioneer Passes Away

Ammon Mercer, pioneer of Southern Alberta, and brother of Mrs. Chas. McCarthy, passed away in Magrath on Monday in his 76th year. He had been ill for three weeks. Ammon Mercer settled in Cardston when he first came to Canada, and for years worked in partnership with Chas. McCarthy on the Mercer and McCarthy stage line, before the advent of the train farther south than Lethbridge. He later moved to Magrath being amongst the town's first settlers.

He had always been an ardent and ambitious Church worker, and led a fine exemplary life. He is survived by his wife and a family of sons and daughters, most of whom are living in the southern part of the Province.

Funeral services were held Wednesday afternoon and interment was in the Magrath cemetery. Quite a large number of Raymond people attended.

IS THE YOUNG HOME

We have been talking our
heads off about the content
of the "Young Home" and the
opportunities Southern Alberta af-
forded, and now this home
is a forever talking of the
"Young Home" is also.

A. J. and I have been talking
about this with a lot of the
other authorities who have vis-
ited us in past years. Elder Ben-
nion voiced his approval of this
part of the study, and urged
the people to stay, and advantage
of the countless opportunities
which are afforded here. Keep
their lands, and make the
HOME. Referring to conditions
here, in contrast with other
parts of the intermountain re-
gion, he said that all signs
showed that we had a very
bright future, and that he was
of the opinion this was what
we could do the best.

One can hardly see the
psychological effect it would
have upon the entire country
side, if everything was here
would be to bring this as
my native land and my future
home. The ill-fated surround-
ings of home and farm would
commence to disappear, and in
their place you will stand a solid

the present, kept in a good build up, and hear visitors say
that of repair, and a need, to "That is where the Mormons
the owner and the common life." Take your pencil and paper
in place of machinery, using a some day and figure out how
active all over the farm, much you are losing by not
it would be housed and taken, keeping things in repair and
care of, and in place of lost machinery under cover.
paint would repair it, kept in. If we value life, surely one
ing the life of most machinery. I have travelled as much as
of lost time, and making a plan for a position to
pleasure to work with. Then too, know what he is talking about,
instead of the present world and if he tells us to stay here
practices which this sort of land, our holdings permanent
farm management, or management and prosperous, why not cor-
agement, induces, land would make to improve what we
take its place, and in a few years, and in no doing make our
years with the opportunity we have, and surroundings a source
have the man on the land, and he tells us to stay here
be, from the land, and he tells us to stay here
note of the difference that comes. "A thing of beauty is a joy
this year's crop is a thing of beauty." And we do not if the
the financial standing of the personal appearance or habits of
district.

It is a pleasure to be to
journey through the district be-
tween Macleod and Red Deer,
and see the well improved farms,
real homes, where perman-
ence to be the keynote of the
surroundings, and beauty is
certainly enhanced hundreds of
times; and then take a view of
our own district and see the
painted and half-fallen down Macleod Bros.

Virgil Quinlan, of Glenwood,
was in Raymond Tuesday even-
ing.

"Slim" Weedin, of Cardston,
was in Raymond district last
evening, and see the same
Saturday, having business with
painted and half-fallen down Macleod Bros.

12. SOME CANADIAN TRAPSHOOTERS

HERE are a few personalities amongst trapshooters on the Pacific Coast, which will be of interest to you.

True Oliver, Ladner, has quite a record as a clay-buster, having won the B. C. Championship on seven different occasions: 1907, 1910, 1911, 1914, 1925, 1927 and 1931.

True was one of the first life members of the Amateur Trapshooters' Association and was a member of the Canadian Olympic Team Shooting at Antwerp, Belgium, in 1920. In 1925 he captured the Pacific Coast Zone Handicap title with a score of 97 x 100 from the 18-yard line. He represented B. C. at the Grand American Handicap shoot held in Chicago in 1921 and in the Champion of Champions' race broke 194 x 200, breaking his first 112 straight.

C. W. (Bill) McLean won the B. C. Championship in 1928 with 195 x 200 and the all-around Championship with 330 x 350 and was runner-up in the doubles with 44 x 50. He also captured the title in 1929 with 191 x 200 and was runner-up in the doubles with 45 x 50 and in the all-around championship. In 1930 he won the handicap trophy with 96 x 100 shooting from the 21-yard mark and in 1925 won the handicap from 20 yards with a perfect score, 25 x 25. Bill also

has won the city championship on three occasions, 1930, 1931 and 1933.

D. V. (Doug) McGary of Victoria has also a fine record, having won the B. C. Singles Championship in 1930 with 192 x 200 and the all-around Championship with 330 x 350. In 1932, he won the Singles Championship with 98 x 100, winning from his team-mate, John Wenger, after a shoot-off, Doug making a possible 25 against John's 24. In that year he also was victorious in the Skeet Championship with 45 x 50. In 1932, he won the State Championship of the Pacific Coast at Lake Crescent with a score of 394 x 400, the all-around Championship of the Pacific Indians and was second in the World's Championship Shoot at Los Angeles with 198 x 200. He has won the Vancouver Island Championship on two different occasions and has enough trophies to fill a good-sized room.

If you have clipped and kept the preceding eleven articles in this series, you have now a fair outline of Skeet, the sport that is so rapidly gaining ground here, a number of clubs having already been formed from coast to coast. Further information will gladly be sent to you upon application to "Dominion Marksman," Box 1260, Montreal, P.Q.

WEEKLY LETTER

WARBLE FLY CONTROL

The subject of this letter, warble fly control, has been attracting considerable attention in many countries including Canada, for a number of years, and your writer thought it would be of interest to our farmer friends to learn of the work being done along this line. The first widespread control measures were inaugurated in Great Britain and Denmark and were so successful that in the latter country legislation has been introduced for compulsory ration wide control measures. Dr. Lionel Stevenson, Provincial Zoologist for Ontario, has been one of the prime movers for control measures in this country and the success of the trials under his direction on Barrow and Manitoulin Islands have been so convincing that other districts have taken up the work.

Control measures were first instituted at the Experimental Station, Lethbridge, during the winter 1932-33, when all the dairy cows were treated and a practically complete lot of all larvae was effected. In the winter of 1933-34 all cattle on the station were treated with similarly satisfactory results.

In order to understand the control measures it is necessary to know the life cycle of the warble fly. The mature fly deposits her eggs on the legs and flanks of the cattle and this is what causes them to stampede during the summer months. The eggs hatch and the young larvae migrate to the region of the gutlet and later on make a second migration to the back. Some cysts are formed in which the larvae undergo development and at this time bore holes through the hide in order to get air and later emerge. When this stage of development is completed they emerge, drop to the ground where they pupate and later appear as the adult flies.

No satisfactory methods have been found for preventing the adult fly from depositing her eggs but an effective means has been discovered for destroying the larvae while they are in the backs of the cattle. The active ingredient in the preparation used for destroying the larvae is Derris powder. This is mixed with soap and other materials to form a powder which,

when mixed with water at the rate of one pound to a gallon of water forms the solution used for treating the cattle. This is applied to the backs of the cattle with a stiff brush when a large number of the cysts containing the larvae show openings through the hide. Several treatments, usually four are necessary at intervals of about three weeks as all the larvae do not emerge at the same time.

The time usually recommended for making the first application is about the first week in March but our experience would indicate that this would be too late under conditions similar to those at the experimental station. Our recommendation to prospective users of control measures would be to examine the cattle the latter part of January and at regular intervals of about a week thereafter and make the first application when a large number of cysts are open.

The destruction and lessening of warble fly larvae are not fully realized by the average farmer but they are very extensive and cause the loss of millions of dollars annually in hides and spoiled sections of beef carcasses. Our recommendation would be for all cattle owner to use control measures for this pest. The treatment is simple, effective and inexpensive and the warble fly powder manufactured by any reliable firm will

A HUGE ADVERTISING BUDGET

Sears, Roebuck, the big United States chain store and mail order corporation, spent \$7,460,000 on advertising last year. This is the largest appropriation for that purpose in the corporation's history.

This vast sum of money was spent with 830 newspapers in the 43 states where the company's 400 retail stores operate. It was an increase of 14½ per cent over the amount spent for advertising in 1932.

The corporation claims that it finds the judicious use of newspaper advertising to fill their requirements adequately.

Beautiful weather was dashed up over the week-end, and everyone enjoyed it. Tuesday and Wednesday were cloudy, but still and warm.

How To Lose Markets

The United States by virtue of its fiscal policy ably supplemented by its idiotic project of restricted production is in a fair way to lose its cotton trade with the world. O writer in Barron's Weekly tells the cotton states about their plight and what is happening to their markets:

"In attempting to help the cotton farmer, Congress and the Federal Farm Board have ignored every phase of the cotton-producing industry except the the South. For America by ers. In so doing, they have unleashed a train of consequences which is threatening the welfare and purchasing power of the whee South. For America by its own acts is losing its cotton export market to foreign competitors.

"The United States cotton producer, who had been enjoying the most favorable position among the world's cotton producers, now holds the most unfavorable position, and is menaced by a character of competition he had never before encountered.

Recently, the Argentine news papers have been urging the Chaco farmers to plant more cotton. The North American cotton producers are now handicapped in the world markets, to your direct advantage, is how the Argentine editors appeal to the Chaco producers.

"Not long ago Germany bought cotton from Brazil and paid for it by selling coal to Brazil. Russia sold cotton to Europe, and bought machinery from Europe. Japan contracted to purchase 1,500,000 bales of cotton a year from India, and India contracted to buy 400,000,000 square yards of cotton cloth from Japan. Russia finding that the capitalistic countries will buy cotton against the sale of commodities Russia needs, is encouraging cotton production. Manchuria, for the first time, has become an exporter of raw cotton. Egypt has removed all restrictions and control from cotton so that the cotton produced in that country may pass into consumers' hands as rapidly as possible."

Every word of this warning can be adapted to Canada & her problem of finding markets for her grain. We have been losing these markets for years and we shall continue to lose them until we face up to the necessity of doing two things: meeting the competitive price of the wheat of other nations in markets where we have to compete on even terms; and taking payment for our wheat exports in the products of other countries, even though this may include manufactured products which will enter into competition with our native manufactures.

These are hard sayings to the wheat grower or the handler of wheat who thinks we have the consuming public of the world by the neck and can make it take our product on our own terms; and to the Canadian manufacturer who believes that the home market should be his at whatever price is necessary to make things comfortable and easy for himself.

For these are trading partners, and we find them disagreeable to us. We shall encounter something much more disagreeable a little further along the road.—Reprint from Winnipeg Free Press.

FOR SALE — A few u.s.d. Sewing Machines. All in A1 shape. See John Shafer or call at Recorder Office.

J. S. Smith, Cardston, was a Raymond visitor today.

CARD OF THANKS
 Mrs. Clifford Scoville, Mr. and Mrs. A. P. Scoville and family, wish to express their sincere thanks for the kind help and sympathy of their many kind friends in their recent bereavement.

R. S. LAW ON GRAIN EXCHANGE

R. S. Law, president of United Grain Growers Limited, issued the following statement on behalf of the Board of Directors of the Company while in Edmonton for the annual meeting of United Grain Growers:

"Impartial inquiry and recommendation obviously by the board of grain commissioners, is required to learn if bear raids were made recently on the Winnipeg exchange by outside interests, and if regulation by the exchange against such attempts is needed."

Mr. Law said that it is "obvious that such matters are not to be satisfactorily settled by a series of contradictory statements issued to the press, or by representations by interested parties made directly to the government."

He declared that the board of grain commissioners commanded the respect and confidence of the country and that the body could be given the status of a commission of inquiry."

Mr. Law said that "the present regulation of grain handling under the provision of the Canada Grain Act and the board of grain commissioners represents the accomplishment of years of experience and study, and is to be regarded as a substantial and satisfactory achievement. Whatever changes may from time to time be required in connection with grain handling should be based on the solid foundation already established."

News Notes

WANTED — A second hand brief case. See The Recorder.

WILL TRADE — Excellent shorthorn cow for something of a milking strain. Information at Recorder Office.

HEALTH

 ASSOCIATION AND LIFE
 INSURANCE COMPANIES
 IN CANADA
IT ACHES!

Good health, personal comfort and appearance demand that the mouth be kept clean, and free from decayed teeth and inflamed gums. Not only will decayed teeth become painful, but they prevent the proper chewing of food, are likely to foul the breath and spoil their owner's good looks. Furthermore, disease in and around the teeth is the cause of many serious disturbances in other parts of the body.

Dental caries, or decay of the teeth, means the disintegration or breaking down of the tooth structure. It is the disease which most commonly occurs in the human family. Some suffer a great deal; others comparatively little. At times decay occurs rapidly and at others, not at all. In other words, individuals vary in their susceptibility to dental caries and there may be variations, from time to time, in the same individual.

If there is one primary or essential cause, it is not known. A number of factors are recognized as contributing to the occurrence of decay of the teeth. We may assume that decay never begins on the clean, smooth surface of a tooth. There must be some groove or crack on the surface or between the surfaces.

It is at such a point that decay begins, the enamel is perforated and the damage spreads inside the tooth. The process is much more rapid inside, because there the tissue is soft as compared with the outer coating or enamel of the tooth, being the hardest substance in the body. The undermining may go on extensively to erode the tooth to the point where it is under the pressure of a bite. At this stage the tooth is sensitive to heat or cold, to substances that are sweet or sour. The real pain, which we know as toothache comes and persists when the decay reaches the pulp of the tooth, as it is there that the nerve is located.

The prevention of dental caries and all that this implies means, first of all, a proper diet, particularly early in life. By a proper diet is meant one that includes milk and fresh fruits and leafy vegetables to supply minerals and vitamins. The teeth and gums are kept healthy by use, so that some course food is desirable to exercise the teeth, gums and jaw muscles. The teeth and gums should be kept clean by being thoroughly brushed, preferably after each meal, but certainly without fail after breakfast and before retiring. The value of antiseptics in the mouth has never been demonstrated.

"Be true to your teeth, or they will be false to you!"
 Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

Call and See Our Samples
 Seeing is Free

This is the Sight Meter, the clever new instrument that measures light, and tells you how much you need for any task. Let us protect your family's eyes by checking the light in your home.

Let us make a free Sight Meter Test of the Lighting in your home

YOUR own eyes can't tell you when your child is straining his eyes. But you can find out if he is getting enough light... by measuring the light from his study lamp.

Now for the first time you can easily have this done. Just phone us and say, "I want you to measure my lights."

Our lighting expert will bring out a new instrument known as a Sight Meter. Held under a lamp, its electric eye measures the light as accurately as a thermometer measures heat... and most important, it tells you how much is needed. Take advantage of this free service today. Call Number 20.
